

Mathieu Austruy

Freelance full-stack web developer

mathieu@austruy.pro

+33 4 11 93 98 28

Montpellier (France) / Rome (Italy)

A web developer since 2007, I work on web platform development and maintenance, business integrations and software quality.

Currently lead developer and technical lead at archètravel.

WORK EXPERIENCE

archètravel, freelance — *Full-stack web developer*

May 2020 - present

Development and maintenance of the tour operator's web platform.

- Development of the quote configurator: departures, rooms, flights, insurance and additional services.
- Integration of FlyLeo for flight search, connection to the internal management system and automation of business processes.
- Modernisation of the WordPress theme, implementation of CI/CD, automated tests, and test and staging environments.
- Improvements to performance, technical SEO and reliability.

GC TECH, freelance — *Full-stack web developer*

July 2019 - June 2025

- **Doyoogo**, tourist activity aggregator: React/Preact interfaces and widgets, contributions to the Symfony back end and integration of partner APIs. CI/CD and maintenance of Docker environments.
- **Generation Voyage**, WordPress travel publication: version control, staging, automated deployments, code review and maintenance.
- **Exod**, travel deals application: contributions to data imports and development and deployment environments.

myCharlotte, freelance — *Full-stack web developer*

August - November 2021

Contribution to the redesign of a support platform for people with cancer: React/Redux interfaces, audio/video player, continuous integration and automated tests.

MySportSession, freelance — *React front-end developer*

March - June 2019

Development of the back office for partner sports venues: interactive calendar and recurring session management in a React application connected to a Symfony/PostgreSQL API.

BedyCasa, Montpellier (France) — *Full-stack web developer*

February 2017 - August 2018

- Development of a booking platform for language-learning stays using a microservices architecture, and a management tool for the sales team.
- Maintenance and development of the **BedyCasa** platform, major Symfony version upgrade and oversight of REST API development for the mobile application.

Kaliop, Montpellier (France) — *Symfony lead developer*

August 2012 - January 2017

- **Univadis**: development and deployment of the medical portal for the United States, France and the United Kingdom, with supervision of an offshore team in Poland.
- **CLAAS**: development of the back office for agricultural equipment rental management.
- **Flammarion**: technical overhaul of the group's corporate websites.

Acelys, Montpellier (France) — *Web developer*

June 2011 - August 2012

Development and maintenance of business applications for **La Poste** and **Orchestra**, including data flows between components of **Orchestra**'s information system. Development of a REST API for the mobile application used by **Journaux du Midi** correspondents.

Freelance, Montpellier (France) — *Web developer*

January - June 2011

Development and maintenance of websites for clients of the communications agency **Cabarey**.

Pop Development, Montpellier (France) — *Web developer*

October 2007 - August 2010

Development and maintenance of **VirtualExpo**'s B2B online trade show platforms: **DirectIndustry**, **ArchiExpo** and **NauticExpo**. Supervision of an offshore team in Singapore.
